Helical Focusers

A: 1.25" sleeve
B: M36.4P1 male

■ Helical Focuser [4317]

●Length: 38-52mm ●Weight: 60g
BORG's most economical helical focuser and the only one with a rotating movement, model [4317] is useful as a supplemental visual focuser that provides fine adjustment for a coarse rack-and-pinion focuser or eliminates the image shift common with standard SCT focusers. The focuser attaches in front via a metric M36.4P1 male thread, but inserts directly into a 1.25" eyepiece sleeve when used with BORG adapter [7316] (which includes threads for 1.25" eyepiece filters).

A: M42P0.75/1.25" sleeve B: M36.4P1 male

■ Helical Focuser S [7315]

●Length: 45-55mm ●Weight: 80g
The deluxe version of model [4317], this non-rotating helical focuser includes index marks on the outside of the barrel, which greatly facilitate focusing when switching between CCD camera and eyepiece. In addition to visual use, this focuser also works well for fine focusing of CCD cameras, digital still cameras and video cameras. The front attachment is a metric M36.4P1 male thread, or 1.25" interface when used with adapter 7316. The rear attachment includes a t-thread.

A: M57P0.75 female
B: M57P0.75 male

■ M57 Helical Focuser S [7757]

●Length: 19-29mm ●Weight: 50g ●OD: 67mm ●ID: 50.8mm
BORG's shortest helical focuser, model [7757] works with a variety of adapters for a wide range of interface options. Its short length is useful in accommodating accessories with long focuser requirement, such as diagonals and binoviewers. This model is recommended for visual use only as its short length does not permit a focus lock screw.

A: M57P0.75 female
B: M57P0.75 male

■ M57 Helical Focuser DX [7758]

●Length: 26-43mm ●Weight: 80g ●OD: 68mm ●ID: 50.8mm
This is a deluxe version of model [7757]. It features index marks and two locking screws, which are useful for imaging applications.

A: M57P0.75 female
M60P0.75 male
B: M57P0.75 male

■ M57 Helical Focuser [7857]

●Length: 49-64mm ●Weight: 165g ●OD: 63mm ●ID: 43mm
A versatile front end interface (M57P0.75 male) allows this focuser to be connected to a wide variety of BORG accessories, including adapters ([7901], [7910], [7911] and [7912]) for third-party scopes, such as Vixen and Takahashi focuser sections. The internal diameter (47mm) is wide enough to cover 35mm format sensors.

A: M60P0.75 male
M57P0.75 female
B: M68.8P0.75 male

■ Helical Focuser M [7835]

●Length: 63-83mm ●Weight: 320g ●OD: 76mm ●ID: 56mm
This focuser is provided standard with Series 80 scopes. BORG adapter [7428] allows this focuser to be attached to an SCT.

A: M89P1 male
B: M95P1 female

■ 4" Helical Focuser [8167]

●Length: 107-138mm ●Weight: 850g ●OD: 112mm ●ID: 84mm
The largest focuser in the BORG helical focuser family, this fully covers a 6x9 format film frame and is recommended for use with Series 115 tubes.

A: M42P0.75 male
B: M42P0.75 female

■ T-thread Helical Focuser [7839]

●Length: 15-25mm ●Weight: 80g ●OD: 60mm ●ID: 39mm
This helical focuser features the T-thread interface common on telescope-camera adapters. The low profile design minimizes the length of light path.

A: M57P0.75 female
B: M57P0.75 male

■ M57 Helical Focuser LII [7860]

●Length: 46-82mm ●Weight: 170g ●OD: 69mm ●ID: 51mm
Longest focus travel in BORG helical focuser family, making this useful for terrestrial photography. This also features the largest internal opening among M57 focusers.

M42 Helical Focusers

A: M42P1 female

■ M42 Helical Focuser L [7841]

●Length: 27-47mm●Weight: 110g●OD: 60mm●ID: 39mm

A long travel (20mm) makes this focuser great for extreme close-ups, or for long focal length lenses such as the Leica L (requires adapter [7844])

A: M42P1 female
B: M42P1 male

■ M42 Helical Focuser [7842]
